OXALIC ACID CLEANER & BRIGHTENER
IRON & SURFACE STAIN REMOVER POWDER

PRODUCT DESCRIPTION: Specco Oxalic Acid crystals are used in diluted form for general cleaning of concrete surfaces. The oxalic acid solution will effectively remove surface rust stains or deposits, vegetation stains, soot and soil deposits. The oxalic acid solution can also be used to lighten old concrete surfaces that appear dull or contaminated.

BENEFITS: COST EFFECTIVE RUST STAIN REMOVER, SURFACE BRIGHTENING ACTION ATTACKS OLD, DIRTY CONCRETE AND PROVIDES A LIGHTER, MORE UNIFORM APPEARANCE

COMPOSITION: 100% OXALIC ACID (DI-SODIUM OXALATE) C2H2O4. CAS # 144-62-7

DIRECTIONS FOR USE: Thoroughly saturate the surface to be cleaned with potable water. Measure 1 gallon of warm water and place into a polyethylene or rubber bucket. Carefully add 1 pound of oxalic acid crystals to the bucket, mixing with a mechanical drill for 1-2 minutes until the solution is clear and the crystals are dissolved. Apply the diluted 10% oxalic acid solution to a small test area to determine suitability and results before making the overall application. Allow the solution to remain on the surface for approximately 5 minutes. Then, working in a circular motion, using an acid brush or stiff bristle brush, agitate the area and work the cleaning solution into the substrate. Rinse with potable water using a garden hose or pressure washer if available. Avoid washing the acidic runoff water into landscaping vegetation. Repeat if needed.

COVERAGE: Approximately 100 square feet per gallon once diluted.

CAUTION: The oxalic acid crystals can be mixed with cold water; however, warm water speeds the dissolving process and ensures a more complete solution. Do not mix oxalic acid with other cleaners, caustic or chlorinated cleaners, as the resulting fumes may be extremely harmful. Acidic materials will attack metal so avoid storing or mixing in metal containers. Do not allow the oxalic acid solution to dry into concrete. This will leave a residue and resulting in further staining or color variations to the surface. After the application, oxalic acid treated concrete surfaces will usually appear lighter than the untreated areas. Once diluted, keep from freezing.

WARNINGS: Oxalic acid is a corrosive powder and can cause irritation or burns. Wear protective clothing, safety goggles, dust respirator, and impervious gloves when handling to avoid contact with skin, lungs, and eyes. Use only in well ventilated areas. FOR INDUSTRIAL USE ONLY. KEEP AWAY FROM CHILDREN. Refer to Material Safety Data Sheet for additional safety information when using or handling. For medical emergencies only, call Chemtrec at 1-800-424-9300.

H.M.I.S. CODES (Hazardous Materials Identification System): HEALTH = 3, FLAMMABILITY= 0, REACTIVITY = 0, PERSONAL PROTECTION. = C

SHIPPING CLASS: ITEM 4440, SUB 2, LTL 77.5 CONCRETE CLEANERS - ACID BASED

FREIGHT INFORMATION (D.O.T.): CORROSIVE SOLID, ACIDIC, ORGANIC, N.O.S. (Oxalic Acid) Hazard Class 8. UN 3261, Packing GROUP III, CORROSIVE.

PACKAGING: 1 lb. “quart” bottle, 8 lb “1 gallon” pail , 40 lb “5 gallon” pail

STORAGE: Store powder in a cool, well-ventilated area, out of direct sunlight. Store in a dry location away from incompatible materials. Keep containers tightly closed.
SHELF LIFE: 1 year in protected storage

LIMITED WARRANTY: This product is warranted to be of merchantable quality when used according to the instruction herein. It is not warranted to be suitable for any purpose or use other than the general purpose for which it is intended. Liability under this warranty is limited to the replacement of the product as purchased, if found to be defective upon inspection by the manufacturer. This limited warranty is issued and accepted in lieu of all other expressed warranties and explicitly excludes liability for consequential damages. Buyer assumes all risk and liability resulting from the use of this product.
